

It's no surprise that
you work on an international level at SKIDATA.
**More surprising perhaps is that
you take on responsibility from the first day on.**

Globally-leading access solutions seek experience hungry talents as

INTERN (F/M) DEVELOPMENT OF WEB APPLICATIONS WITH HTML5, CSS3, AND ANGULAR - PART TIME (16 HRS)

The technology behind our gates and access readers is as surprising as it is convincing, with thousands of our systems in more than 100 countries – for example at ski resorts, airports, stadiums and amusement parks.

YOUR RESPONSIBILITIES

You extend and maintain the SKIDATA Common HTML 2 Framework – a framework for the development of SKIDATA web portals and web applications - by working with the Softwarehouse Klagenfurt team to develop new components and services, which meet the requirements of our SKIDATA products. The Common HTML 2 framework is currently used in 14 SKIDATA products – with a strong upward trend.

YOU CONVINCED WITH

- Ongoing technical training in the field of software development
- Good knowledge in developing single-page web applications with HTML5, CSS3 and JavaScript
- Knowledge of Angular 4+ and TypeScript
- Innovative, analytical and research thinking
- Very good written and spoken English skills
- Commitment and high solution orientation

WE SURPRISE WITH

- International environment
- An international team of specialists
- Valuable practical experience
- Professional work equipment
- Freedom that motivates
- Tips for your studies & job

Apply now if you want to secure your contribution with the world market leader.

We offer a market-compliant internship compensation on a full-time basis (EUR 1.600 Bachelor Student, EUR 1.700 Master Student).

überraschend überzeugend
