

## .NET Software Engineer Mobility and Automation (f /m)

### Job description

Join our Klagenfurt team and develop global applications and services in the workplace area with special focus on mobility. Your software development experience with C#/.NET is highly welcome.

Our department is responsible for Infineon's **global mobile device environment**. This includes mobile device management, software deployment, development of mobile apps, cost reporting and hardware standard definition. Furthermore, the team develops and operates key solutions to **automate core processes** in the workplace area and provides solutions to enable the user with easy to use service experience.

In this job you will be responsible for the **design and development of new applications and services**. A tailored training period will provide you with the necessary knowledge and skills for this position.

Tasks and responsibilities of this job will include:

- Support **mobile activities** with focus on production
- Support the **automation** of existing **global processes** and **setup new processes** especially in the context of mobility
- **Enhance** and further **implement productive applications**
- **C ollaborate** closely with **regional** and **global teams**
- work on **shared codebases with teams** as well as **work independently**

### Profile

We are looking for a **passionate .net C# software engineer** who values and uses **best software development practices and technology**, is a **team player**, an innovative **problem solver** and has a strong desire to deliver **quality software**. If you have software development experience with **C#/.NET**, strong programming fundamentals and you are motivated to be part of an innovative agile team, please contact us.

You are best equipped for this software job if you have:

- Solid **IT or computer science education** or relevant **working experience**
- Strong **C#** programming skills
- Strong **.NET Framework skills** (such as ASP.NET MVC, .NET Core, Entity Framework, LINQ etc.)
- Significant experience with **SQL** and **relational databases**
- Experience with **HTML, CSS, JavaScript** and **common libraries** such as jQuery
- Experience in **mobile app development** for iOS or Android are a plus (e.g. Xamarin, Xcode, Swift etc.)
- **User interface design** skills and understanding of **software design and architecture patterns** are a plus
- **team player** attitude and good **communication** skills
- advanced **English** language skills are mandatory, **German** skills are a plus
- also seen as plus are skills in the following areas:
