Senior Staff Engineer IT ERP Architecture (m/w/div*)

Job description

In this role you will work collaboratively within the IT Enterprise Resource Platforms organization and across IT lines to drive and assist the creation of IT Technology Strategy and Architectures with strong focus on Enterprise Platforms (SAP). This will include among other things the selection and incubation of emerging technologies and approaches in order to test whether they will enable Infineon to deliver its objectives and seize opportunities in a timely manner. In this role you will face the challenge of consolidating and harmonizing our complex system and application landscape on a global scale. This gives you the opportunity to set your own footprint and to make this project your project.

In your new job you will:

- Drive and assist the **development of the ERP Security Initiatives**, Principles and Guidelines
- **Provide security concepts and solutions for On Premise and Cloud products** and work with Business Continuity Team, System Admins, Development and Operations Teams to implement security strategies
- Drive and assist **risk mitigation**, and fulfill **security governance** and best practices within the environment
- Drive and assist the **development of the ERP User Experience (UX),** Principles and Guidelines
- Analyze and ensure **technical feasibility for all required applications and device types**, also from UX perspective and making sure overall IT architecture and UX strategy are not contradicting each other

Your personal contribution will be valuated and appreciated as the cornerstones of our success. And all that in a beautiful surrounding which guarantees a high quality of life. ARE YOU IN?

Profile

You are able to quickly establish successful cooperations and gain new insights by questioning existing assumptions. You recognize and seize potential for improving efficiency with determination and work perseveringly on making things better, faster, and more efficient.

You are best equipped for this task if you have:

- A degree in **information technology**, **industrial engineering, computer science** or similar
- At least 5 years of **professional experience in SAP project lifecycle implementations** or operations
