

WE'RE MORE THAN SOFTWARE DEVELOPERS.
**IT'S ALL ABOUT
THE EXPERIENCE.**

DevOps Engineer (m/f/x)

DevOps | Continuous Delivery | Automation | Self-Healing IT | Open Source

Fascinated by cutting-edge cloud technologies? You want to bring our customers to the next level on their journey to Autonomous Cloud Enablement and self-healing IT? You want to help our customers automate their release processes and put cutting-edge release validation and auto-remediation at our customer's fingertips in our keptn team? Apply and be part of our young, motivated, and highly talented team.

Your role in the team

- **Drive** the integration of the Keptn open-source **CI/CD workflows** into our internal pipelines
- Develop and extend our build, integration, and delivery pipelines for Keptn
- **Automate** workflows to support continuous testing
- Collaborate with and assist your colleagues in international development teams
- Evaluate and extend our tooling to continuously **improve quality**

Your profile

- Technical education related to IT (HTL/Kolleg, FH, University)
- **Automation** is the natural way of doing things for you
- Experience with **cloud-native CI/CD** tools (e.g. Helm, Jenkins, ArgoCD, ...) and **GitOps** workflows
- Working knowledge of **containerization technologies** (Docker, Kubernetes)
- Good knowledge of at least one programming language (Java, GoLang, TypeScript)
- Experience with agile development is a plus

You will love this job if

- you look for new challenges **with Angular, React, JavaScript and TypeScript**.
- you appreciate **team spirit** and like swapping new ideas with your teammates.
- you take working with agile methods (**Scrum**) for granted.
- an **international environment** is attractive to you.

Due to legal reasons, we are obliged to disclose the minimum salary for this position, which is € 42,000 gross per year based on full-time employment (38.5 h/week). We offer a **higher salary** in line with qualifications and experience.
